

OFFSET ROTARY MOWER (REAR LOADER) MITI MIKE

The Hardee Miti Mike is a hydraulic offset rotary mower designed for compact tractors with 22-34 HP. Operator has full control from the "Driver's Seat" for mowing ditches and banks. The Miti Mike has no belts, pulleys or troublesome drives and it is equipped with an oval blade carrier with free-swinging blades. The Miti Mike comes equipped with front and rear rubber shielding. The mower head moves hydraulically up and down and mechanically in and out. Reach from the center of tractor to outside edge of mower is 9'1" max. The width for hauling is 7'5". Hydraulics on this machine are fully self-contained running off the tractors PTO and is complete with a 12 gallon oil tank and is assembled and ready to use. It requires 1 remote outlet for cylinder operation.
