

The DB4048 and DB4060 come equipped with round blade carriers and rubber shielding (front and rear). They require dual hydraulic remotes on the tractor. Operator has complete control from the driver's seat. Machines come complete with 35 gallons of hydraulic oil and are completely assembled and ready to use. "Touch and Go" is available as an option for tractors without dual remotes. These are ideal for trimming low overhanging tree limbs, ditches and banks. Counter balance adjusts automatically as cutter head is moved. Mower head moves in, out, up & down and has reversible blade rotation.
